Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 28 April 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 5 recites a cleaning apparatus for cleaning parts and communicating with the management apparatus. The cleaning apparatus is briefly and vaguely described on page 9, lines 5-12. The examiner does not know what the cleaning apparatus is. No new matter may be added.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 6-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okigami in view of Antziopoulos et al.

Art Unit: 3627

Okigami shows all of the limitations of the claims except for specifying numerous transmitters, where data is stored and specifically monitoring operation value compared to life value.

Okigami shows, figure 1, a networked connected device 5 (terminal apparatus, copier) with storage section 11 (first memory), a communications section (controller, see figure 2b), and a network connection. There is a trouble management server 2 (management apparatus) with storage section 21 (second memory).

Antziopoulos et al. teaches, figure 1, a copier system with monitors. In order to change these replacement components individually depending on the particular rated service life (life value), each replacement component is associated with its own level-of-use detector (operating value). See column 3, lines 34-36.

Based on the teaching of Antziopoulos et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Okigami system to specifically monitor operation value compared to life value in order to change these replacement components individually.

The examiner takes Official Notice that multiple transmitters can take the place of network connections in order to provide a cheaper and more simple means of data transfer and that it would be obvious to one of ordinary skill in the art to store data in any one of a number of database in order to provide more convenience.

Based on the discussion above, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Okigami system to replace the network connections with multiple transmitters in order to provide a cheaper

and more simple means of data transfer and to store data in any database in order to provide more convenience.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nolet shows a system of interest.
